

Robert Smith

Technical Designer II

PERSONAL STATEMENT

9 years of combined experience as a Technical Designer and patternmaker in garment fit and construction. An expert seamstress and fit consultant in many garment classifications with a specialization in menswear and classic tailoring techniques.

WORK EXPERIENCE

Technical Designer II

Varsity Spirit Fashion - July 2014 - May 2019

Responsibilities:

- Responsible for creating technical design sheets for new styles of cheerleading uniforms, dance uniforms, and competitive wear.
- Created technical drawings in Adobe Illustrator with clear specifications of garment construction.
- Attended product development meetings to inform the team of new construction details and finishes for new styles.
- Volunteered to translate all technical design sheets to Spanish, therefore, increasing quality of samples because of better communication with sewing operators.
- Verified all pre-production samples meet quality control before handing off to production.
- Maintained and updated all information about technical design sheets in PDM.
- Communicated any discrepancy in technical packages through PDM to Costing and Design department.

Technical Designer

ABC Corporation - 2010 - 2014

Responsibilities:

- A key member of the team designing cold & warm weather accessories for C9, Dakine, Dockers, ExOfficio, J.C.
- Penny, Kmart, Kohls, Lands End, Life is Good, L.L.
- Bean, Marmot, Merona, Mossimo, Pistil, REI, San Diego Zoo, Sears and Target.
- Created specification packages, including illustration, flat sketch with measurements, fabric, construction details, sewing instructions, trim sheet, and special applications within tight timeframes.
- Analyzed sample quality and pattern ensuring products were developed in a manner consistent with established standards and made appropriate adjustments as necessary.
- Communicated daily with international vendors and product team members, ensuring a smooth development process working through the specification, construction, or fabrication issues.
- Set up / reviewed product testing, implementing corrections, therefore reducing rejects and improving product quality.
